

JACK THE RIPPER

A dark, atmospheric illustration. In the center, a figure wearing a black top hat and a long, dark cloak stands within a large, arched stone doorway. The figure is silhouetted against a bright, yellowish light coming from the other side of the arch. The figure's right hand is visible, holding a small, dark object. In the foreground, a large, pale, and somewhat distorted foot is visible, appearing to be part of a body lying on the ground. The overall scene is set in a dark, stone-walled environment, possibly a tunnel or a crypt.

JACK & HIS VICTIMS

Mary Ann Nichols (Aka Polly Nichols) died on 31st August 1888. She was the first victim.

Her throat had been deeply severed in two locations – nearly decapitating her – and her lower abdomen partially ripped open by a deep, jagged wound. The killer had also made several other incisions in her abdomen with the same knife.

Annie Chapman (Aka Dark Annie) was killed on 8th September 1888.

Her throat had been cut in much the same manner as Mary Ann Nichols had been slashed, and her abdomen ripped entirely open. Her intestines, torn out and still attached, had been placed over her right shoulder. A later autopsy revealed that the killer had removed her uterus and parts of her vagina.

Elizabeth Stride was killed on 30th September 1888: Elizabeth was a Swedish prostitute and was mutilated. He was interrupted so...he had to find another victim! It's the night of the "Double event".

Catherine Eddawes was killed on 30th September 1888: as "Jack the Ripper" could not do his work properly with Elizabeth Stride, so he took revenge with Catherine Eddowes.

Her throat had been severed and her abdomen torn open with a deep, jagged wound. Her left kidney had been removed, along with a major portion of her uterus.

Mary Jane Kelly was killed 9th November 1888.

As the murder took place within wall, Kelly's body was mutilated beyond recognition. Her entire abdominal cavity had been emptied out, her breasts cut off, and her viscera had been deliberately placed beneath her head and on the bedside table. Kelly's face had been hacked away and her heart removed, which was also absent from the crime scene.

SIR WILLIAM GULL

He was a teacher and was fired from his school. He committed suicide by drowning himself in the river just after the last victim.

MONTAGUE JOHN DRUITT

He was Jewish and spent long periods in the mental asylum due to paranoia and hallucinations. He was a misogynist - had a strong hatred against women.

AARON KOSMINSKI

I am Jack the... were the last words of this convicted serial killer before being hanged. He studies medicine but killed his victims by poisoning them.

He was Polish and arrived in London in 1887. He ran a barber shop. He was a serial killer as he killed some of his lovers.

THOMAS NEAL CREAM

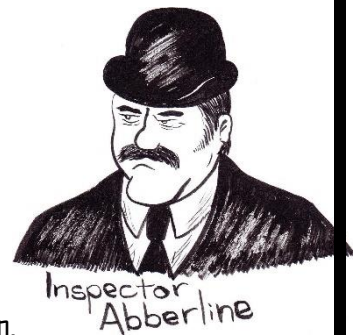

GEORGE CHAPMAN

WHICH OF THESE SUSPECTS DO YOU THINK COULD HAVE BEEN THIS INFAMOUS SERIAL KILLER ?

Think of the following:

- Jack the ripper must have had some kind of medical knowledge.
- He cut his victims' throat from left to right.
- He only killed prostitutes.
- He killed his victims, removing some organs sometimes.
- He acted in the middle of the night in dark alleys in the East end of London.

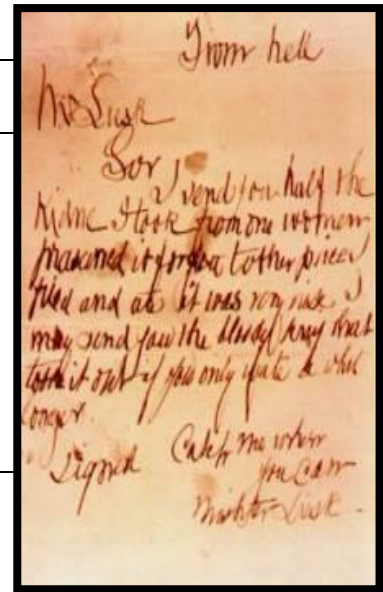

Our opinion is **SIR WILLIAM GULL** was Jack the ripper because he tried to cover up an illegitimate Catholic heir to the throne. He was personal doctor to Queen Victoria. She ordered that he had to resolve her family problem, but she didn't know that he would act in that way. Sir William Gull had huge knowledge of human anatomy. He was right-handed because he cut his victims' throat from left to right.
